## Valve Specification

Rubber seat butterfly valve made of ductile cast iron with excellent strength. With 3 types of disk materials, it can be used for a wide range of fluids. The disk made of aluminum bronze casting with excellent resistance to sea water is also available as a semi-standard. The rubber seat is fixed to the rigid resin back-up ring to reduce deformation and improve durability. It can be used stably even in the case of negative pressure in the piping.

Note) When used in hot water supply lines or in fluids containing chlorine, EPDM and NBR may deteriorate prematurely depending on conditions.
